Registration drives professionalism

Launched in 2019, the Registered Specialist Trade Contractors Scheme (the Scheme) was an industry-wide driven and recognised registration scheme in Hong Kong for specialist trade contractors established by the Construction Industry Council (CIC). It comprises Registered Specialist Trade Contractors of seven Designated Trades and Registered Subcontractors of other common trades. The Scheme earmarks a significant milestone in subcontractor registration mechanism in Hong Kong.

CMS

Register Now

The Provisional Construction Industry Co-ordination Board implemented "Voluntary Subcontractor Registration Scheme" with a view to building up a pool of capable and responsible subcontractors with specialised skills and strong professional competence. The Scheme was mapped out based on the recommendations arising from the "Construct for Excellence" Report of the Construction Industry Review Committee".

- Benchmark the common standard in subcontracting through increasing the construction project control and enhancing the manpower supply chain.
- Spearhead proactive professional image and improve service offerings.
- Ease the contractor selection process by comprehensively listing the registered specialist trade contractors.
- Provide a favourable environment for industrial growth by the cultivation of the talent contractors under the Scheme.
- Offer a chance to substantially improve the productivity and to sharpen competitiveness of construction industry reaching the opportunity brought by Guangdong-Hong Kong-Macau Greater Bay Area.

REGISTERED SUBCONTRACTORS

Registered Subcontractors are applicable for other common trades in civil, building, electrical and mechanical work

Civil

Building

Electrical and mechanical

Note: With effect from 1 April 2019, the Subcontractor Registration Scheme (SRS) has been renamed as the Registered Specialist Trade Contractors Scheme (RSTCS) together with a couple of enhancements.

All subcontractors who are registered under the seven trades namely Demolition, Concreting Formwork, Reinforcement Bar Fixing, Concreting, Scaffolding, Curtain Wall and Erection of Concrete Precast Component of the SRS have automatically become Registered Specialist Trade Contractors under the RSTCS and no application is required. All subcontractors who are registered under the remaining trades of the SRS have been retained as Registered Subcontractors under RSTCS and no application is required. All reference to the SRS shall be substituted by the RSTCS with effect from 1 April 2019.

The online application system, where subcontractors are required to update under the relevant trade available in the SRS, will be discontinued.
